

CS110 · ACTION 6A · REQUIRED WORKSHEET

C# Code Map

Label what the tutorial code does before you change what it says.

or Run the tutorial first.

Follow [Ready to Code Some C# NET](#) in Visual Studio. When the app runs, use this sheet to name the parts. Your final pathway app may replace or extend “Hello World.”

Selected context

Use a technical context · Console Status Check

02 Find the parts.

Visual Studio note: A newer Console App may use top-level statements, which means the compiler supplies the Program class and Main method. Label the parts you can see and write “compiler supplies it” for hidden parts.

```
using System;

class Program
{
    static void Main()
    {
        Console.WriteLine("What is your name?");
        string userName = Console.ReadLine();
        Console.WriteLine("Hello, " + userName);
    }
}
```

Library	Class	Main method	Prompt	Input + variable	Output
---------	-------	-------------	--------	------------------	--------

03 Explain each label in your own words.

Class

A container that groups related code.

The class is located at the top. The class is called program.

Main method

The method where the console program begins.

The program begins at the top middle.

Method / function

A named action. In C#, a function inside a class is called a method.

writeline sets what you would like the userName to "say".

Variable

A named place that remembers a value.

userName remembers the console writeline.

Console.WriteLine

Displays a line of text in the console.

```
"Hello World"
```

Console.ReadLine

Waits for typed input and returns that text.

```
console.WriteLine
```

04 Trace the data.

INPUT

the learner will type a userName

VARIABLE

console.WriteLine

OUTPUT

Hello World

05 Plan your pathway version.

What will you replace or add after the tutorial app works?

i would like to add all the stuff that we have learned for the past weeks of this course. and i will replace hello world with welcome to karoiva.

Optional ways to go beyond the tutorial

- ☒ Another prompt ☐ A decision or conditional ☐ ASCII art in the console
☐ An image in README.md ☐ Another tested feature

06 Save the evidence.

1. Complete every written section.
2. Select **Print or save PDF**, or take clear screenshots.
3. Place the PDF or screenshots in your GitHub Week6/evidence folder.
4. Commit and push the worksheet with your Action 6A project checkpoint.
